## **NEW Deadline to Submit your Workshop to CCC**

### **Submit your CCC 2020 Workshop by May 4, 2020**

Following the ever-changing realities that we are facing with COVID-19, **the Scientific Program Committee Executive has made the decision to extend the deadline for Workshop submissions for CCC 2020 until Monday, May 4, 2020.**

Our team at CCS is carefully monitoring the situation and recognize that many of our members are directly impacted by clinic and office closures as well as increased patient demands. We hope that this extra time will alleviate some immediate pressure and give you a bit more time to adjust to the precarious reality that is COVID-19.

In light of social distancing and using new and innovative ideas and technology to connect and share information, it's a perfect time to submit your Workshop to CCC 2020. Workshops are and will continue to be an extremely collaborative and important aspect of CCC programming.

When creating your workshop, consider collaborating with [CCS Educational Partners and Affiliates](#). It is a great way to disseminate new and innovative information to an expanded target audience.

The deadline to submit your Workshop to CCC is now Monday, May 4 at noon EDT. Please read the [Workshop Submission Guidelines](#) for submission details.
