LEARNING OBJECTIVES

Upon completion of this educational activity, participants will be better able to:

Recognize the cardio-renal connection in patients with heart failure

Analyze the current evidence for heart failure treatment options in patients with kidney disease (focus on ARNI and SGLT2i)

Optimize heart failure guideline-directed treatment options in patients with kidney disease

Discuss communication pathways among interdisciplinary HCPs to optimize the management of patients with heart failure and co-morbid renal disease

Construct a plan to integrate recent evidence into practice

SCIENTIFIC PLANNING COMMITTEE

CHAIR

ANIQUE DUCHARME MD, MSC, FRCPC
Cardiologist, Institut de cardiologie de Montréal

LOUIS GIRARD MD, MBT, FRCPC
Nephrologist, University of Calgary

LISA MARIE MIELNICZUK BSC, MSC, MD, FRCPC
Cardiologist, University of Ottawa Heart Institute

PAUL RENÉ DE COTRET MD, FRCPC
Nephrologist, CHU de Québec

ANDREW STEELE MD, FRCPC
Nephrologist, Lakeridge Health
