CANADIAN SOCIETY OF VASCULAR MEDICINE

The C-SVM aims to advance the health of patients with or at risk for vascular disease through education, research, policy, advocacy, and community engagement. The C-SVM promotes excellence in medical care for arterial, venous, and lymphatic diseases of all etiologies and ensures close collaboration with diverse surgical and medical specialties. Through vascular medicine education, the C-SVM seeks to advance the training of vascular medicine practitioners, maintaining a high standard of practice.

MISSION

Improve the health for all patients with or at risk for vascular disease and to support vascular medicine practitioners in the delivery of this care.

CORE VALUES

EXCELLENCE

We are devoted to the discovery of new treatments, to the improvement of patient care pathways, and to attaining optimal health for all vascular patients.

LEADERSHIP

We will put ourselves at the forefront of vascular care, tackling the most pertinent and challenging issues facing patients with vascular disease. We will represent vascular patients and vascular practitioners at a local, national, and international stage.

COLLABORATION

We will create a community for vascular practitioners of multiple disciplines and work together to solve the most challenging issues facing vascular patients.

INCLUSION

We aim to represent the voices of diverse stakeholders. This includes patients and practitioners from different socioeconomic, ethnoracial, geographic, and religious backgrounds. We believe in both the strength and the moral obligation of diversity.

INNOVATION

We strive to find new solutions to the challenges and barriers facing vascular patients and vascular practitioners. We consistently seek new ideas and explore out of the box thinking to stay at the forefront of excellent care.
